

We provide direct to garment print process for 100% cotton and polyester/cotton blend garments for white, and pastel colours. For more information on this process, see page 2 of this document.

Dark garments and 100% polyester garments, bags and caps are provided in full colour with our ultra light heat transfer process. See further details below.

Wide Format Print Processes

Full colour print on ultra light film transfer, die cut and heat applied to t-shirts, polo shirts, business shirts, bags, caps and more.

We use the  inks that are a remarkable innovation in ink technology that provide a faster drying time, higher density, wider color gamut, improved scratch resistance and a broader uncoated media support. In addition, ECO-SOL MAX is virtually odorless and user friendly. ECO-SOL MAX graphics are water, scratch and UV resistant up to 3 years outdoors.

With full colour print and precision contour cutting, we can provide the following products.

- colourful decals and labels,
- **FULL COLOUR** digital heat transfers for **DARK GARMENTS**
- posters to Point Of Purchase (POP)
- materials and virtually every kind of sign imaginable.

VersaCAMM produces graphics with outstanding durability indoors and outdoors - even on ordinary vinyl! Now we can provide economical banners, signs and vehicle graphics that will last up to three years outdoors without lamination. (Three years outdoor durability is based on accelerated weather tests conducted by Roland DG. Results may vary depending upon location and application).
